

Driving Innovation
Advanced Telematics
for Fleet and Worker Safety

Telematics into the future

Hexicor Telematics is a managed telematics solutions provider and part of the broader Hexicor Group, a national ICT services organisation headquartered in Brisbane, Queensland.

Hexicor Telematics was formed by bringing together Hexicor's telematics division and AMA Fleet, uniting two of Teletrac Navman's Platinum Dealers into a single business.

The integration combines deep industry experience with a demonstrated ability to deliver for customers at scale, positioning Hexicor Telematics as a highly capable and leading telematics service provider across Australia.

Our strength is our people. Backed by the national scale and operational depth of the Hexicor Group, and operating across Queensland, South Australia, Victoria, and the Northern Territory, Hexicor Telematics delivers consistent, high-quality telematics outcomes for government, enterprise, and SME customers nationwide.

Vehicle Telemetry

Improving Fleet Performance

Hexicor Telematics converts raw vehicle data into clear, actionable operational insights.

By combining Teletrac Navman's enterprise software with the extensive coverage of the Telstra network, we provide a unified "single pane of glass" view. This allows you to centralise asset management, lower compliance overheads, and run a highly efficient fleet.

- **GPS & Asset Tracking:** 24/7 high-definition vehicle tracking and location monitoring across the reliable Telstra network.
- **Utilisation & Maintenance:** AI-driven insights to monitor asset usage, forecast service needs, and extend equipment life.
- **Remote Diagnostics:** Real-time tracking of engine faults and tyre wear to resolve issues and prevent breakdowns.
- **API Integration:** Seamless data sharing between your telematics ecosystem and internal business systems or software platforms.
- **Compliance Management:** Automated tracking of speed, idling, and operational parameters to lower emissions and meet regulatory requirements.

Video Telematics

Vision Meets Intelligence

Protect your drivers and manage liability with visual context.

We deploy intelligent, AI-powered dashcams that combine high definition footage with real-time analytics to capture critical road events automatically.

As an elite Platinum Partner, we deliver instant dashboard uploads, moving your business beyond passive recording into proactive risk management.

- **Smart Dashcams:** Intelligent sensors that automatically identify risky driving behaviours and provide real-time verbal feedback.
- **Driver Monitoring & Coaching:** Automated safety scorecards and real-world footage to build transparent, habit-changing coaching programs.
- **Incident Exoneration:** Undeniable HD video evidence to protect your team from false claims and safeguard your brand reputation.
- **MULTI IQ Multi-Camera Visibility:** Integrated side and rear configurations to eliminate blind spots with high-definition, multi-angle fleet visibility.
- **Instant Event Retrieval:** 4G Telstra network connectivity ensuring event-triggered recordings are available in seconds on your dashboard.

Worker Safety

Protecting Your Mobile Workforce

Fulfill your duty of care with dedicated monitoring tools built for high-risk, isolated, or remote environments.

We provide the vital communication infrastructure and automated alerting systems needed to keep field personnel safe.

Our solutions give your office team immediate visibility, ensuring that help is always accessible and every worker returns home safely.

- **Lone Worker:** Continuous monitoring and dedicated safety protocols to protect employees working independently without immediate supervision.
- **Fatigue Management:** Automated tracking of driving hours and rest breaks to ensure regulatory compliance and prevent fatigue-related incidents.
- **Remote Worker:** Reliable satellite and cellular tracking across the Telstra network to keep isolated field staff connected in any location.
- **OHS Management:** Digital safety scorecards and automated incident logging to support workplace safety compliance and risk mitigation.
- **Duress:** Instant, one-touch emergency alert triggers that immediately notify managers and dispatch coordinates during critical situations.

Fleet Account Management

Partnering for Your Success

Your technology investment requires ongoing care to deliver maximum return.

We back our solutions with local Australian expertise, strategic account management, and regular performance reviews.

This ensures your system stays aligned with your shifting commercial goals, keeping your personnel fully trained and your data highly actionable.

- **Local Support:** Australian-based technical specialists available to resolve queries promptly and minimize fleet operational downtime.
- **Dedicated Account Manager:** A single point of contact focused on understanding your long-term business goals and strategy.
- **Onboarding:** Structured training programs and deployment plans to ensure rapid staff adoption and smooth system integration.
- **Hexicor Insights:** Tailored reporting and data analysis to help you uncover hidden cost savings and performance trends.
- **Quarterly Business Reviews:** Regular strategic audits to analyze fleet performance, maximize system utility, and align with your evolving needs.

Professional & Technical Services

Seamless End to End Execution

A successful telematics rollout relies on precision engineering and efficient physical deployment.

We handle the entire installation process, from custom software calibration to physical hardware fitting, using our skilled in house technicians and a trusted regional subcontractor network.

This structured approach ensures minimal vehicle downtime and absolute data accuracy from day one.

- **In House Installations:** Expert deployment delivered by our qualified technical specialists to ensure consistent quality and hardware reliability.
- **Subcontractor Partnerships:** A vetted network of trusted partners to provide scalable deployment and local support across all regional areas.
- **Equipment Service & Maintenance:** Ongoing physical audits, troubleshooting, and repairs to keep your tracking devices operating at peak performance.
- **Equipment & Software Configurations:** Tailored calibration of sensors and user dashboard profiles to align with your specific fleet reporting goals.
- **Project Management & Coordination:** Dedicated oversight of full hardware rollouts, managing scheduling and timelines to guarantee seamless delivery.

Customised Solutions

One Solution Doesn't Always Fit Your Needs

Every sector faces distinct commercial pressures, meaning off the shelf software rarely suffices.

As an elite Teletrac Navman Platinum Partner, we configure modular technology ecosystems built specifically for industries like transport, construction, and government.

We integrate tools like fuel tax recovery and asset tracking into your workflow, giving you the exact precision needed to uncover hidden profitability.

- **TN360: AI-Driven Fleet Management:** Our cornerstone platform uses AI to turn real-time data into a unified, single pane of glass view of your mobile workforce.
- **Vision: AI Smart Dashcams:** High-definition edge computing that automatically identifies distracted driving and tailgating before an incident occurs.
- **Work Diaries: Digital Compliance:** Fully integrated Electronic Work Diaries (EWD) and Smart OBM to simplify NHVR requirements and track axle mass in real time.
- **FTC Manager: Tax Recovery:** Automated Fuel Tax Credit maximizing via high-definition GPS data that accurately differentiates between on-road and off-road travel.
- **Asset Track: Non-Powered Assets:** Ruggedised, solar-powered hardware designed to extend tracking visibility to trailers, containers, and yellow goods.

MANAGED SERVICES / SUPPORT

What sets Hexicor Telematics apart?

Standing out by delivering actionable fleet intelligence.

National Reach, Local Presence

With expert technical teams across QLD, SA, VIC and NT, we provide rapid, localised installation and support backed by a national fleet operation.

Tailored Solutions

We don't believe in one size fits all hardware. Every deployment is modular, engineered around your unique asset types, regulatory pressures, and operational goals.

Deep Industry Expertise

Our team consists of seasoned transport and technology professionals with decades of combined experience across transport, logistics, construction, and government.

Innovation That Drives Results

We are always pushing the envelope, integrating advanced AI analytics, smart sensors, and the reliable Telstra network to future-proof your fleet.

Whole-of-Business Focus

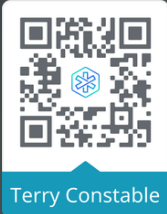

We look at the big picture. From frontline driver safety and cabin dashcams to back-end compliance and tax recovery, we align every solution with your broader commercial strategy.
